

# FINE UKRAINIAN CONFECTIONERY FOR GLOBAL MARKETS

CATALOGUE OF UKRAINIAN  
CONFECTIONERY EXPORTERS  
AT ISM 2024

# GENERAL FACTS ABOUT UKRAINE

Ukraine is the largest country in Europe by territory. Most of its land, 42.7 million hectares precisely, is used for agriculture. Agricultural land area of Ukraine equals to that of Germany and France together. Around one third of the best soils in the world are located on the territory of Ukraine.

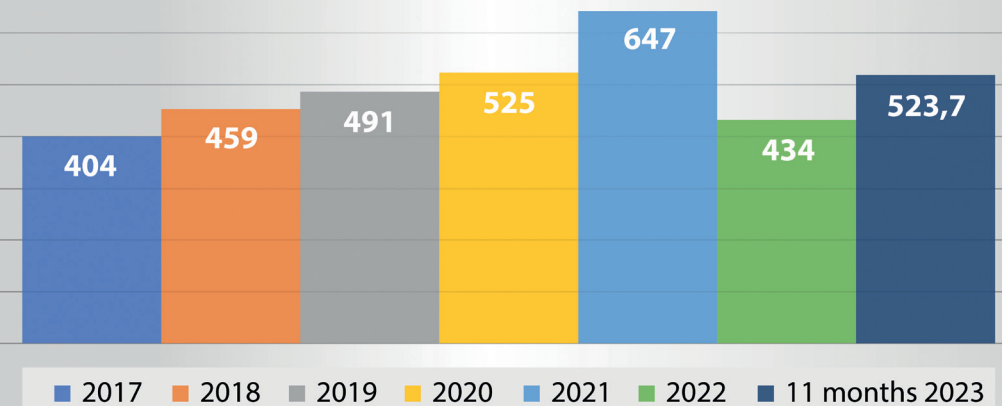

Despite the fact that Ukraine is in a state of full-scale war with Russia since February 24, 2022, and many businesses have been damaged or lost due to hostilities, disruption of supply chains, significant complications in logistics:

- the majority of production facilities were preserved, damaged enterprises were repaired, some enterprises were transferred to safe territory and their activities were resumed;
- many export positions were able to remain at pre-war indicators and even grow;
- Ukraine expands land transport corridors and exports to the EU;
- continued deliveries of products to African and Asian countries;
- The European Union introduced a free trade regime with Ukraine, which gave Ukrainian manufacturers the opportunity to more widely present their products on European markets. The same right of free trade of Ukrainian products was granted by Canada and Great Britain;
- the "sea grain corridor" functions in cooperation with the UN and Turkey, without Russia, for agricultural products;
- most agricultural land has been cleared of mines and planted with new crops;
- critical infrastructure and roads are being restored.

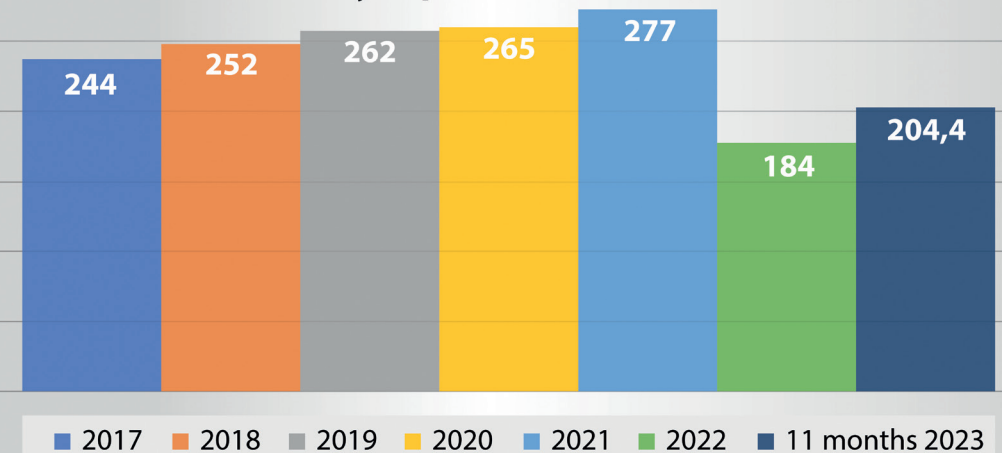

The EU, which has very high quality and safety requirements, is the main importer of Ukrainian food and agricultural products, including organic ones. Many Ukrainian manufacturers, in addition to ISO, HACCP and other quality and safety certificates, have Halal certificates.

The issue of food safety of Ukrainian products has never been questioned by other countries.

**Confectionery export 2017-2023 (1000 tons)**

Analytical data of Ukrkondprom

# WHY UKRAINIAN SWEETS?

---

- Ukraine has a very efficient large-scale domestic production of almost all key raw materials for confectionery: sugar, honey, wheat flour, milk powder and vegetable oils & fats.
- Ukraine is using beetroot sugar in its confectionery products, which, unlike cane sugar, has no starch and dissolves faster. Thus, consumers feel the sweetness and the taste faster. Specialists also note that beet sugar has slightly different aroma, taste and aftertaste.
- Today more than 100 countries in the world enjoy Ukrainian confectionery, including USA, Canada, China, EU, Central Asia and MENA countries.
- Rich European culture and tradition of confectionery production of Ukraine go back to the 19th century. The first confectionery factory in Ukraine was established back in 1896 and is still working (Biscuit-Chocolate).
- While premium in quality, products from Ukraine are very price competitive due to lower costs of inputs, energy, labor and land.

# PJSC «DNEPROPETROVSK FOOD CONCENTRATES PLANT»

## PRIME SNACK LLC, SNECO™

### ABOUT THE COMPANY

The company was established in 2016 as a hobby startup. We had always been passionate about the cheese. So, we began exploring ways to improve upon it. We asked ourselves, What can we do better? What is the cheese of the 21st century? Through a gradual process, we discovered an innovative technology for dehydrating cheese, transforming it into a crunchy and even more flavorful form. Moreover, our cheese balls have a long shelf life, eliminating the need for refrigeration. Our product is the perfect healthy and natural snack for the modern era.

### KEY FACTS

- Production capacity - 100 000 t per month
- More than 20 SKU are produced
- Exports to EU and US
- All-natural ingredients
- Modern and new production lines
- Unique design of products and packaging
- Certificates: ISO 9001, ISO 22000, FSSC 22000
